Professional Summary

Full-Stack Java Developer with **3+ years of experience** in building secure and scalable applications. Proficient in **Java, Spring Boot, React.js, Node.js, and microservices** with a solid understanding of cloud environments such as **AWS, Azure, and OpenShift**. Experienced in **designing REST APIs, working with databases (MySQL, PostgreSQL, MongoDB, Oracle)**, and developing responsive front-end applications using **React.js, Redux, Material-UI, and JavaScript**. Working with the DevOps tools like **Docker, Kubernetes, Jenkins, GitHub Actions, and SonarQube**. Skilled in **Agile/Scrum applications, automated testing (JUnit, Selenium, TestNG)**, and providing **cloud-native and high-performance applications**.

Education

Clark University, Worcester, MA

Master of Science in Computer Science — Aug 2023 – May 2025

Ellenki Institute of Engineering and Technology, Hyderabad, India

Bachelor of Engineering in Electronics and Communication — Jun 2019 – May 2022

VNR Vignana Jyothi Engineering and Technology, Hyderabad, India

Diploma in Electronics and Communication — Jun 2016 – May 2019

Professional Experience

Java Developer – Samsung USA

Feb 2024 – Present

- Developed and deployed Spring Boot microservices for manufacturing analytics using Java 17.
- Designed cloud-native solutions deployed on AWS ECS with automated CI/CD pipelines (Jenkins, GitHub Actions).
- Designed REST APIs and connected them with Node.js middleware for faster responses.
- Used React.js, Redux, and Material-UI to create interactive web pages for business users.
- Implemented Maven-based builds and maintained clean dependency management.
- Integrated JIRA, Confluence, and Bitbucket/GitHub for Agile project tracking.
- Used Eclipse & IntelliJ IDE for enterprise development.
- Automated CI/CD pipelines with Jenkins, integrated with SonarQube and Nexus for quality checks and artifact management.
- Built reusable frameworks for environment management and conducted peer code reviews to enforce Java security standards.

Software Engineer (Java + Python) – Syrma SGS Technology Pvt Ltd, India
Mar 2021 – Mar 2023

- Designed and developed REST APIs in Spring Boot integrated with SCADA/PLC systems.
- Implemented secure database queries (SQL, PL/SQL) and optimized PostgreSQL performance.
- Used Node.js services for real-time communication between front-end and back-end.
- Deployed enterprise-grade applications on Azure Services and JBoss Enterprise Application Server.
- Automated system testing using TestNG & Selenium; collaborated closely with QA to resolve defects.
- Contributed to CI/CD pipelines in Jenkins; integrated code quality checks via SonarQube.
- Worked closely with QA using Selenium and TestNG for automated testing.
- Designed technical documentation and database schemas for production systems.

Technical Skills

Languages: Java 8-21, Python, SQL, Bash, JavaScript(ES6+)

Frameworks: Spring Boot, Hibernate, Flask, FastAPI, Spring MVC, React.js, Redux, Node.js, Express.js

Databases: MySQL, PostgreSQL, MongoDB, Oracle SQL Developer

Build Tools: Maven, Gradle

Web Technologies: REST, JSON, HTML5, CSS3, Bootstrap, Material-UI, Thymeleaf

Cloud Platforms: AWS (ECS, S3), Azure (App Services, Monitor), PaaS (OpenShift, PCF), JBoss EAP, Linux

DevOps & Tools: Git, Docker, Kubernetes, AWS, Azure, Jenkins, GitHub Actions, IntelliJ, Eclipse, Postman, SonarQube, Bitbucket, CLM

Testing Tools: Junit, TestNG, Selenium

Collaboration Tools: JIRA, Confluence

Professional Skills: IT Services, Program Management Support Services, Operational Efficiency

Practices: Secure Coding, Agile/Scrum, Microservices Architecture, CI/CD Pipelines, Cloud-Native Deployments, SDLC, Design Patterns, Data Structures, Algorithms

Academic Projects

- **Situational Awareness AI:** Built a GPS tracking & geofencing platform; improved emergency response.
- **TA Application Portal:** Built a full-stack application for automating TA job applications and evaluations.
- **IoT Greenhouse Monitoring:** Python-based system for tracking and controlling environmental variables.

- **Face Recognition Attendance:** Designed a face detection system for automated attendance tracking.
- **Air Pollution Monitoring System:** Developed a sensor-based solution to monitor air quality levels.
